

THE FLAVOR FACTORY × THERABREATH

Breath of Innovation

Capabilities workshop for the TheraBreath team · July 8, 2026 · Norco,
California

Resiliency, innovation, operations, and partnership.

9:00 AM start

R&D + Procurement

Workshop prototypes · QC review

Confidential

02

HOW TO FOLLOW ALONG

Six sections. One conversation.

This deck mirrors the live workshop site. Follow in order — each slide maps to a step in the visit.

01

Partnership

02

Agenda

03

Four pillars

04

Tasting

Concepts

06

Next steps

Review pillars

Jump to slides 7–11 for honest answers on what TheraBreath asked to see.

01

PARTNERSHIP

Flavor partner to a growing brand.

TheraBreath is scaling across rinses, toothpastes, and new formats. This visit walks your team through how we develop, produce, and support the flavors behind that growth — from Norco, with the same team from first sample to repeat order.

We make flavors that work inside real products — alcohol-free, process-ready, and built to repeat in production.

One team

Development, production, and quality at our Norco facility. No third-party hand-offs on your formulas.

Oral care

Rinse and paste formats — cooling profiles, sweetener systems, compliance documentation.

Built to scale

A long-running partnership with room to grow. Today we show the systems, not just the samples.

01

WHAT THIS VISIT IS ABOUT

Show the system, not just the samples.

A capabilities review, not a sales pitch

Open discussion with facility walk-throughs, documentation, and working sessions. The bigger goal is mutual confidence.

Four pillars, one conversation

- **Resiliency** — Can we protect supply as volumes grow?
- **Innovation** — Can we bring ideas proactively?
- **Operations** — Can we scale cleanly?
- **Partnership** — Are we aligned long-term?

02

JULY 8 AGENDA

Your day in Norco.

Suggested arrival: 9:00 AM · conference room across from The Flavor Factory · lunch off site 11:30–1:00.

TIME	SESSION	FOCUS
9:00–10:00	TFF Presentation	Four pillars · conference room across the street
10:00–10:15	Facility Walkthrough	Production, QC, TheraBreath room
10:15–10:30	Break	Reset before tasting
10:30–11:15	Tasting	Three stations · blind mapping · scorecard
11:30–1:00	Lunch	Off site — hosts take the group
1:00+	Open Q&A	Your topics · wrap when ready

Four pillars. Honest answers.

1 • Resiliency & Business Continuity

Protect the core. Be ready when demand moves.

- Capacity planning
- Redundancy
- Quality systems
- Continuity planning

2 • Innovation & Technical

Give people another reason to reach for the bottle.

- Flavor creation
- NPD & trends
- R&D roadmap
- Sensory science

3 • Supply Chain & Operations

Keep the work clean, repeatable, and visible.

- Single Norco facility
- Lead times
- Sourcing
- Batch traceability

4 • Partnership & Growth Vision

Stay close and keep building together.

- Growth alignment

PILLAR DEEP DIVE

Resiliency & Business Continuity

TheraBreath needs a flavor partner who can keep pace without surprises. We walk through capacity planning, quality framework, and contingency thinking — with documentation your procurement team can take back.

Capacity planning

Working conversation on production load vs. growth scenarios — detailed figures shared in session, not invented on slides.

Quality & compliance

- SQF program
- GMP · FDA registered
- Kosher / Halal / Organic evaluated per formula

Continuity framework

- Approved + alternate suppliers
- Backup capacity
- Cross-trained staff
- Documented recovery

Innovation & Technical Capabilities

We develop inside TheraBreath's reality — alcohol-free freshness, sodium chlorite stability, rinse bases, and oral-care compliance. The 10:30 AM tasting block is your chance for honest directional feedback on workshop prototypes.

What we bring to oral care

- Mint, cooling, and botanical profiles for rinse and paste
- Formulation inside real products — not just sample cups
- Tight development loops with clear version tracking
- Bench sample to repeat production at Norco

Trends to discuss

- Functional freshness — calming botanicals, gum-health cues
- Herbal, green, spice, vanilla — prototype stretch · QC retain review per profile
- Seasonal and limited-edition concepts
- Format stretch — rinses, toothpastes, adjacencies

Supply Chain & Operations

Family-owned flavor manufacturer in Norco — not a broker. Development, production, and quality under one roof gives TheraBreath direct visibility into how flavors are made and released.

Facility tour highlights

- Mixing & blending
- QC & documentation
- Blue production room — TheraBreath manufacturing
- Raw material storage · R&D flavor lab

How we run production

- Documented batch release procedures
- Lead times discussed openly in session
- Approved suppliers with qualified alternates
- COAs, allergen statements, label support

Recent investments: Walk-through during morning tour — areas invested to support oral care volume and batch documentation.

PILLAR DEEP DIVE

Partnership & Growth Vision

Our intent: stay close on communication, bring ideas before you have to ask, and invest in the capacity and R&D your growth requires.

Now **Prove the partnership** — July visit, capabilities review, co-created priorities from tasting and workshop.

Near-term **Pilot the winners** — Larger batches, formal sensory, claims and packaging shaped together.

Medium-term **Scale what works** — Repeat production aligned to volume forecasts and seasonal support.

Long-term **Grow the pipeline** — Ongoing co-development with a partner who knows your base systems.

Hosts: Dan Wixted (President) · Alex Wixted (Operations) · Kelly Ziegler (Office Manager) · Ryan Wixted (Quality and Regulatory) · Matt Wixted (Production Manager).

05

FORMULATION PRINCIPLE

Built for sodium chlorite stability.

We screen every direction against sodium chlorite chemistry. Mint-forward lanes are the strongest starting points; vanilla, florals, and cucumber-water notes are workshop samples under retain review — worth tasting for direction before scale-up decisions.

× AVOID IN YOUR BASE

Citrus Lemon-lime Berry Tropical-fruit Pineapple

Can degrade quickly in sodium chlorite and develop pool-water off-notes within days.

✓ BUILT FOR STABILITY

Mint Spearmint Herbal Green tea Vanilla Ginger Eucalyptus

Preferred building blocks — but each concept still needs retain proof. See QC tags on workshop cards (cleared · TBD · concern).

Three stations. One focused tasting block.

Station 1 · Classic Freshness

Anchor in what TheraBreath does best.

- Icy Mint
- Dazzling Mint
- Healthy Gums
- Current line benchmarks

Station 2 · Innovation Lab

Ten coded prototypes (M1–M10) — blind flavor mapping first, then reveal.

- Blind flavor mapping · /mystery
- Print Blind Flavor Mapping ballots + codename roster at station
- Reveal + discuss · slides 14–15
- Prototype Scorecard · /score after names shown

Station 3 · Functional Benefits

Freshness with a reason beyond mint.

- Calming evening profiles
- Whitening-enhanced cooling
- Winter Frost seasonal LE
- Healthy Gums Herbal

Light refreshments between stations. Branded notebooks with trend insights at each seat.

04

FLAVOR TRENDS

Fresh can stretch further — within the base.

01 • Functional + sensory pleasure

Fresh works harder when people enjoy using the product — and when flavor still tastes right on day 30.

02 • Beyond mint, within the base

Herbal, green, spice, and vanilla without citrus and berry instability.

03 • Natural-forward profiles

Cleaner cues that feel clear, bright, and intentional.

04 • Kids and adult indulgence

Room for family-friendly and more adult routines.

05 • Limited-edition energy

Limited runs create a reason to try now — e.g. Winter Frost seasonal LE.

HOSPITALITY

Warm welcome. Thoughtful details.

Light refreshments

Palate-friendly bites during tasting — lunch off site from 11:30 AM.

Custom sample kits

Take-home flavor samples in elegant packaging plus branded notebooks with trend insights.

Dedicated host team

Dan, Alex, Kelly, Ryan, and Matt Wixted — your points of contact from presentation through open Q&A.

Follow-up within 24 hours

Thank-you email, summary deck, sensory scores, and co-created innovation roadmap.

06

CO-CREATION & NEXT STEPS

After the workshop.

Leave Norco with a clear picture of how we work, what we can build together, and a prioritized plan for what comes next.

Keep the idea intact

- Make larger pilot batches
- Run formal sensory panels
- Build claims and packaging around winners
- Move strongest concepts toward production
