

Suggested Agenda

Breath of Innovation · Tuesday, July 8, 2026 · Norco, California

All times below are suggested. We will adjust in the room to match your team's pace and priorities.

WHY YOU'RE VISITING

What this day is — and isn't

Your R&D and procurement colleagues asked for a **capabilities review and working session** at our Norco facility — not a sales presentation. You will see how we develop, manufacture, and support the flavors behind TheraBreath's growth, with the same team from first sample to repeat order.

- **Four pillars** — resiliency, innovation, operations, and partnership (your team's ask)
- **Norco facility** — real walkthrough of production, QC, and TheraBreath-dedicated areas
- **Lakewood site parity** — sensory validation plan for mouthrinse production as you scale
- **Directional tasting** — ten workshop prototypes; honest feedback via blind mapping and scorecard
- **Partnership alignment** — growth scenarios, procurement qualification, long-term supplier fit
- **Oral-care innovation** — sodium chlorite flavor work, competitive calibration, functional directions

Suggested arrival: 9:00 AM

Conference room across from The Flavor Factory

10:00 AM onward — 2058 Second Street, Norco, CA 92860

SUGGESTED SCHEDULE

Your day in Norco

Suggested time	Session	Topics we can cover
9:00 AM	Arrive · check in	Conference room across from TFF · casual business attire · closed-toe shoes for tour
9:00–10:00	TFF presentation	Four pillars your team asked to see — resiliency, innovation, operations, partnership
10:00–10:15	Facility walkthrough	Production, QC, TheraBreath room — single-site dev + manufacturing + quality
10:15–10:30	Break	Reset before tasting
10:30–11:15	Tasting	Ten workshop prototypes · blind flavor mapping · prototype scorecard
11:30–1:00	Lunch off site	Your hosts take the group · back by 1:00 PM
1:00 PM+	Open discussion & Q&A;	Lakewood parity · procurement · growth · chlorite innovation · your pace

PRESENTATION BLOCK · 9:00–10:00

Four pillars — topics from your email threads

- Resiliency** — Capacity and continuity as volumes grow · redundancy if a supplier or equipment fails · certifications (SQF, GMP, FDA-registered facility)
- Innovation** — Sodium chlorite flavor architecture · chlorite-stable prototypes · GA-22131 garlic functional thread · competitive intensity-tier read
- Operations** — Single-site traceability from sample through production · quality systems · supplier qualification documentation
- Partnership** — Communication cadence · investment alignment · embedded support for Lakewood and future site transfers

TASTING · 10:30–11:15

Ten coded workshop prototypes (M1–M10). Use your phone on our site: **Blind Flavor Mapping** while cups are coded, then **Prototype Scorecard** after the host reveal. Directional feedback only — not a final product decision.

FROM YOUR EMAILS

Subjects, questions, and statements we can address July 8

These themes come from conversations with Ross Conroy (Sr. Fragrance & Flavor Development) and Neonila Levitsky (Sr. Manager, Fragrance, Flavor Design & Innovation). We grouped them by topic — bring anything else that matters to your team.

Lakewood site parity · Ross Conroy · Jun 2026

- "What validation plan do you propose for Lakewood mouthrinse production?"
- How to know if there is or is not a taste difference between sites (triangle test, ISO 4120)
- If there is a difference — how to characterize it (blind paired profiling, flavor fingerprint)
- Consumer validation methods for Tier-A SKUs (Icy Mint, Dazzling Mint, Sparkle Mint)
- Support for eight variants on trial timeline (Icy/Mild/Rainforest → Sparkle mid-Sep)
- Panel location, reference site per SKU, and sensory parity sign-off workflow

Competitive calibration · Ross & Nelly · Feb–Mar 2026

- "This is being seen as a competitive threat... directed towards our core FRESH BREATH — MILD MINT variant" (Ross, Feb 6)
- Listerine Extra Mild tier evaluation across Cool Mint, Freshburst, Total Care
- Nelly asked for business-owner framing and TFF's holistic oral-care lexicon
- GA-22131 garlic functional — efficacy POV, chlorite stability, familiar pleasant odors
- Open items: allicin/DADS references and chlorite stability read on functional directions

Capabilities & partnership · ongoing threads

- Four pillars your team asked to see — not a sales pitch, a working review
- Virtual procurement session before the visit (topics TBD with your team)
- Scalability if TheraBreath volume doubles or triples — honest capacity conversation
- Sensory science support beyond Lakewood — triangle, blind, expert screening, CLT/HUT
- Sodium chlorite flavor architecture — stability, vanilla directions, mint layering

BEFORE JULY 8

Questions welcome anytime

If anything comes up before the visit — logistics, dietary needs, topics to prioritize, or questions about Lakewood validation — reach out to **The Flavor Factory team**. We will get you answers before July 8.

The Flavor Factory

2058 Second Street · Norco, CA 92860
(951) 273-9877 · flavorfactory.net

Online visit guide:

HELPFUL TO KNOW

Come prepared

- Casual business attire · closed-toe shoes for the production walkthrough
- Phone charged — Wi-Fi on site for tasting tools at 10:30 AM
- Questions ready — technical, operational, and partnership topics welcome throughout
- No pre-reading required — this PDF and our visit site have what you need

WHAT YOU'LL LEAVE WITH

After the visit

- A clear view of our facility, team, and how we work
- Documented answers on the four capability areas your team asked about
- A sensory summary from your scorecard submissions
- Follow-up email within 24 hours with next steps and named owners
- Lakewood parity reports per variant as trials complete through September

Breath of Innovation

Capabilities first · Tasting second · Partnership outcome third
