FLAVOR NAT PEPPERMINT VANILLA TYPE FL FOOD GRADE

Attributes

Number	62012072	*Container Description	1 gallon jugs, 5 gallon pail, 55 gallon drums
Description	FLAVOR NAT PEPPERMINT VANILLA TYPE FL FOOD GRADE	*Storage Conditions	Store in a cool dark dry place at 40-75F in sealed full containers.
Rev Release Date		Special Requirements	Visual Description: A colorless to pale yellow colored liquid. Shake well before using.
Subclass	Raw Material	*Plant Retain Requirements	Manufacturer to follow their internal sampling and retain procedure.
Lifecycle Phase	Preliminary	*Plant Sample Requirements	Manufacturer to follow their internal sampling and retain procedure.
*Responsible Party	andryla	*Shelf Life (from date of manufacture)	12
Creation Date	15-Dec-2025	*Shelf Life UOM	Months
Note & Comments	PE-22004	Analysis Profile/Retest Period	Full testing / N/A
Legacy Number		*Shelf Life Extension Allowed	No
Legacy Rev		If Yes - Extension Time Allowed	
*Base UOM	LB	If Yes - Extension Test Requirements Comments	
*BOM Output Qty			
*Raw Material Category	Flavor		
*Raw Material Name	Nat Peppermint Vanilla Type FL		
*CAS #	57-55-6; 2216-51-5		
*Material Grade	Food Grade		
*Certification	*N/A		
*Allergens	*N/A		
Notice of Change	The supplier shall alert C&D of any major changes to the general production process, quality plan, raw materials, design, test methods or other areas covered in this specification prior to implementation. A minimum of 90 days advanced written notice of change shall be directed to the attention of the Specification Originator, Corporate Procurement and Global Quality. Qualification activities will be identified, agreed upon, and carried out on a case by case situation.		
Bovine Spongiform Encephalop	The supplier must certify that the raw material (and any of its components) being supplied, whether imported or US-sourced, and whether sourced directly or through your supply chain, meet the requirements of Title 9 of the US Federal Code of Regulations (CFR) Sections 94.18 and 95.4, and Title 21 CFR, Sections 589.2000 and 589.2001 regarding BSE (a.k.a. Mad Cow Disease) and TSE. Such certification implies that any materials supplied to Church & Dwight Company are sourced from regions or stock where BSE/TSE has not been detected, and in which there is no undue risk of BSE/TSE being introduced. It also implies that raw materials supplied to Church & Dwight for use in food, drug, cosmetic and animal feed/food/drug products have not been manufactured from, processed with, and do not otherwise contain prohibited cattle materials.

FLAVOR NAT PEPPERMINT VANILLA TYPE FL FOOD GRADE

Hazardous Substance

All finished products, raw materials and packaging components supplied to Church & Dwight must meet the specific local, state and federal regulatory requirements for restricted or prohibited hazardous substances, for example:

- Chemicals of high concern to children (CHCC)
- Prop 65
- California Safe Cosmetics Act
- TSCA
- Heavy Metals in Packaging
- US Consumer Product Safety Improvement Act
- RoHS/WEEE/REACH

Specific regulatory requirements will be agreed upon on a case by case basis. It is expected that the supplier notify Church & Dwight Co., Inc. in the event materials used have property sensitivities that may potentially leech, migrate, or negatively impact product safety or efficacy.

Latex-Free

This product shall not include any natural rubber latex (NRL) containing material without prior written consent from Church & Dwight.

California Proposition 65

Supplier shall guarantee and certify their finished product does not contain any substance(s) found on the active Prop 65 listing. However, when applicable, the supplier shall clearly identify, specify and monitor any active Prop 65 substance(s) present at any level, and deemed required and/or unavoidable as a result of being intentionally introduced through raw materials or the manufacturing process of the finished product. It is the suppliers responsibility to communicate this information to Church & Dwight as part of this raw material specification development and approval. Any changes or issues of non-conformance applicable to this agreement and specification shall be immediately communicated to Church & Dwight as per the **Supplier Change Notice requirement referenced separately on this specification. Updates (annual) to the active Prop 65 listing can be found at: http://www.oehha.ca.gov/prop65/prop65_list/Newlist.html#list

Container Labeling Requirement

- Identity of contents, net weight or quantity, supplier and manufacturer name, part number, lot number, C&D material number, C&D PO number.
- DOT requirement: Appropriate DOT labeling must be included on the label.
- OSHA requirement: CAS number of the five most predominate substances including any environmentally hazardous substances greater than 0.1% must be included on the label when applicable..
- Inadequately labeled, damaged or unsealed containers will be rejected.
- When appropriate, shipping containers must state special environmental restrictions and/or recommendations (such as temperature or humidity).

Documentation Requirements

The following must accompany each shipment:

- Bill of Lading including lot number.
- Certificate of Analysis reporting results of agreed tests. At a minimum, CofA's must include manufacturer name, manufacturer address including the country of origin, part number, lot number, PO or order number.
- SDS and/or TDS available upon request unless proprietary.

Allergen Statement

ONLY for specific suppliers of material used in Food, VMS and Sodium Bicarb

The supplier must have the primary elements of an allergen control plan that includes: identification of ingredients containing food allergen(s); management of these ingredients (e.g., physical segregation), process controls, validated cleaning processes, label controls, label reviews and employee training.
